

AI Video Generation & Editing

Professional One-on-One Course | Beginner to Advanced | Practical Project-Based Learning

DURATION	LIVE CLASSES	ONLINE FEE
2 Months / 8 Weeks	3 Days/Week · 1 Hour	PKR 35,000

Course Overview

Learn to create professional AI-powered videos for social media, brands, advertising, storytelling and e-commerce. Develop practical skills from prompt writing and image generation to animation, sound and final editing.

What You Will Learn

01 AI Video Foundations

AI video workflows, creative planning, aspect ratios, formats, tool selection and responsible AI use.

02 Prompt Engineering

Visual storytelling, shot descriptions, camera directions, lighting, motion and structured prompts.

03 AI Image Creation

Generate realistic characters, products, environments and consistent visual references using image AI tools.

04 Text-to-Video & Image-to-Video

Generate scenes from text and still images; control motion, composition, continuity and quality.

05 Character & Scene Consistency

Maintain character identity, wardrobe, product appearance and environments across multiple shots.

06 AI Commercials & Product Ads

Build product launches, brand advertisements, fashion clips and e-commerce video content.

07 Voice, Audio & Lip Sync

AI voiceovers, sound effects, music selection, dialogue timing and lip-sync fundamentals.

08 Professional Video Editing

Edit in CapCut or Adobe Premiere Pro: cuts, pacing, transitions, captions, color and sound.

09 Social Media Video Production

Produce Instagram Reels, TikTok videos, YouTube Shorts and platform-ready exports.

10 Final Portfolio Project

Plan, generate, edit and deliver a complete AI promotional video or short narrative.

Learning Outcomes

Create AI video concepts, produce multi-shot scenes, develop consistent characters, edit commercial-quality short videos and prepare a small portfolio for freelance or brand projects.

Course Details & Fees

Online One-on-One: PKR 35,000 total for 2 months.

Physical One-on-One: PKR 60,000 total for 2 months.

Schedule: 3 live classes per week, 1 hour per class (approximately 24 sessions).

Class Format: Personalized instructor-led training, practical assignments and project feedback.

Software: AI image/video platforms (selected based on availability), CapCut and/or Adobe Premiere Pro.

Important: Paid AI platform credits, subscriptions and software licenses are not included in course fees unless explicitly agreed.
